

I really enjoyed your course, I am glad that I have met you as my Mandarin teacher. Your active and very balanced (various materials to learn, fun!) teaching methods were so helpful that I wanted to learn more. I have to admit I could have done more, such a pity that I missed a couple of courses due to work or holiday. I appreciate teachers like you, when it comes to learning a foreign language, those who could nicely push/provide students to learn with different types of materials. I was lucky whilst learning German back then too. So happy:)

The highlight regarding the material was especially having a whatsapp group during the course with all! This is such a genius idea, we need everything we have learnt in that daily used/expected way!

I really regret not continuing the course further, as mentioned due to university, but I will definitely contact you in June once I am done with the semester.  
Or I'd appreciate if you could update me with course plans 2015 when ready.

Thank you so much Michelle, and I will see you tonight!  
晚见!
